

Steps for Team Creation in Kaggle

1. Kindly make sure you create a [Kaggle account](#).
2. Go to the [Problem link](#) and **accept the rules** under the “Rules” tab
3. Identify a Team leader from your team for creating a team name for the Kaggle competition. Ensure that your team leader should enter the team name for submission in the specified format as shown below. **team<number> Example: team1 (Considered)**.

Overview Data Notebooks Discussion Leaderboard Rules ...

Manage Team

Team Name

test1 Save Team Name

This name will appear on your team's leaderboard position.

Team names with the above-mentioned format are only taken into consideration for evaluation. Team names are case sensitive and no special characters are allowed. **For example: team_1 (Not considered) , Team_1 (Not Considered) , team.9 (Not considered) , Team.9 (Not Considered)**

3. Apart from Team leader, remaining Team members within the team should log in into their kaggle account and enter their **names** in the **Team Name Field** as mentioned in the below screenshot and click on **Save Team Name**.

Manage Team

Team Name

Amulya Save Team Name

This name will appear on your team's leaderboard position.

4. Only the **Team Leader** can send the merge request for adding the team members to the Kaggle competition. It can be done by searching your names (individual names) in the **Invite others field** as shown in the below image. Team members will get the merge request respectively. The team members

will belong to that Kaggle competition team only after accepting the merge request sent by Team Leader.
